

# COMPASS GREEN PROJECT - - MOBILE GREENHOUSE

Nick Runkle and Justin Cutter

- a way to deliver information on sustainability and bio-intensive mini-farming
- runs on waste vegetable oil
- holds two raised beds for plants like mustard greens, lettuces, broccoli, chards, & amaranth
- show visitors what they're growing and used for workshops to teach skills like seed sowing and transplanting
- also: rainwater capture system, compost bin, solar panels
